
The Single Resolution Board has raised around EUR 42 billion in contributions to the Single Resolution Fund

- The Single Resolution Fund has raised EUR 9.2 billion in contributions to the Single Resolution Fund corresponding to 2020. With this contribution, the SRF will accumulate a total of around EUR 42 billion euros in the form of contributions from 3,066 banks and investment firms, collected through National Resolution Authorities.
- Together with contributions for 2015 to 2020, the 96 Spanish credit institutions and investment firms included under the scope of the SRF have contributed a total of approximately EUR 4.4 billion.

Madrid, 15/07/2020.

The **Single Resolution Fund**, whose funds would be used for the resolution of financial institutions in certain circumstances, will grow over a transitional period of eight years (2016-2023) and must reach at least 1% of the covered deposits of the Member States that make up the SRM by the end of 2023. 1% of covered deposits currently amount to EUR 62 billion and is expected to be close to EUR 70 billion at the end of 2023.

During this transitional period, the contributions from the entities of each country are assigned to different compartments corresponding to each Member State (**national compartments**). The use of these compartments is subject to progressive mutualisation between all participating Member States (euro area). They will therefore cease to exist at the end of this transitional period.

In order to achieve the aforementioned targets, institutions must make **ex-ante contributions** annually to the Single Resolution Fund. These contributions are calculated on the general basis of the institutions' liabilities, excluding own funds and covered deposits. The amount will then be adjusted in accordance with the risk profile of each institution. In order to calculate the **ex-ante** contributions, the Single Resolution Board applies the methodology set out in Commission Delegated Regulation 2015/63 and in Council Implementing Regulation (EU) 2015/81.

In the case of Spain, the **96 contributing institutions** made contributions in 2020 **totalling EUR 847 million**, compared with EUR 708 million in 2019.

It is also important to remember the existence of the Spanish **National Resolution Fund**. The **33 investment firms and branches in Spain of entities established outside the European**

Union that are not included under the scope of the Single Resolution Mechanism (mainly applicable to credit institutions) contribute to this Fund. The total amount collected by said fund stands at approximately **EUR 5.6 million**.
